Copper the goldfish

Jamal won a goldfish at the fair! He was very excited and bought a bowl for the goldfish to live in. He called the goldfish Copper.

The next day, Jamal brings his friend Sally round to see Copper, as he knows she also has goldfish. Sally was surprised at the size of the bowl the fish was kept in. She kept her goldfish in an aquarium that looked like this.

She explained that goldfish can live for a long time and that they can grow very large, so it's always best to provide as large a tank as possible for them. Jamal made a promise to start saving his pocket money to save up for the biggest tank he could afford.
